CPR for BLS Provider, BLS Healthcare Provider or Professional Rescuer or Adult and Pediatric CPR/AED (from American Red Cross)

- CPR certification that is equivalent to the American Heart Association Basic Life Support (BLS) for Healthcare Providers is required for the nursing program. The BLS for Healthcare Providers includes training for CPR, AED, and choking for adults, children, and infants. Students will learn single-rescuer and team basic life support for adults, children and infants.
- Heartsaver CPR is **not** acceptable for our program.
- If you need information about Healthcare Provider CPR classes, you may contact the following: You are not limited to this list. **Any online CPR classes MUST also have a skills test in-person.**
