T-E INCORPORATED’s surveying and engineering department is looking for a candidate to hire. The position available will be a part time or full time depending on the applicant’s qualifications. This position is for CAD drafting, field crew for surveying and engineering.

The CAD drafting requirements of this position will be drafting boundary surveys and engineering plans and the research that goes along with the drafting that is needed to complete the projects.

The field crew requirements will be to obtain physical data of existing conditions, preconstruction conditions and post construction conditions. This includes, but is not limited to boundary surveys, topographical survey, vertical surveys, construction staking/layout and post construction data collection to verify that the project was build correctly. The field crew operations will be completed using the latest and greatest surveying technology available.

The above described positions will most likely be filled by one person who is willing to help with all aspects of our company. T-E INCORPORATED is the only site construction company in the Fort Wayne area that offers true design build. We are a one stop shop for all site needs.

Preferred qualifications for this job are as follows. You must have a strong work ethic, be friendly and be a team player. Your education and current skills are secondary to you being a good person. It is more exciting to come to work with others that want to perform to the same high level of quality and production, who want to work together to get projects completed. On the job training will be provided. We all try to learn something new every day.

We also have construction positions available.

If you are not graduating this spring that is ok, we are flexible and willing to work around your school schedule.

We look forward to hearing from anyone interested in a position with room to grow and expand.

Sincerely,

T-E INCORPORATED
