The Office of Research and External Support (ORES) is a unit within the Office of Academic Affairs (OAA) created to serve the scholarly and creative activities of faculty, students, and staff. Our mission is to facilitate the procurement of external support through research grants, contracts, and technical assistance agreements; to administer internal support for research; and to document and publicize the scholarly achievements of members of the IPFW community.
The Office of Research and External Support is pleased to present the seventh annual report of research activities at IPFW. Total awards during the 2008–09 fiscal year exceeded $4.6 million, with applications for new funding exceeding $11 million.

Federal funding in support of research and student services activities represents an essential component of the university's support, and for the third consecutive year, funding from federal sources represents the largest category of support received.

The continued growth in federal grant and contract activity is the result of a strategic plan to target funding sources that support the facilities and administrative costs of university operation. By contributing directly to the growth of the institution through their receipt of federal funding, our researchers are not only supporting their own work, but they are also making an essential contribution to the economy of northeast Indiana.

As a regional comprehensive university, IPFW is committed to providing both an outstanding educational experience for our students as well as supporting the creation of new knowledge through the scholarly achievements of our faculty. We invite you to take a moment to review the wide range of projects that have received extramural funding.

IPFW is deeply appreciative of the efforts of our faculty and staff who have so greatly contributed to the growth and success of our university and region.

Overseas Conference Fund grants are offered by IPFW, Indiana University’s Office of the Vice President for International Affairs, and the Purdue Research Foundation. These grants partially offset the costs for faculty members to present the results of their research in venues that gain international recognition for them and the university. This year 28 faculty members received awards totaling $32,015.

IPFW and other Indiana University or Purdue University internal grant programs: In addition to the overseas conference funds, IPFW and various IU or Purdue offices provided research support to six faculty members totaling $26,930.
EXTERNAL AWARDS SOURCES

Each of the following organizations provided grant or contract support to IPFW this year. Though some made multiple awards, each organization is listed only one time.
