The IPFW Math Club PI
and Pi Mu Epsilon
are pleased to present

The Music of the Primes

We will be showing some of The Music of the Primes, a DVD by Dr. Marcus du Sautoy, holder of the Charles Simonyi Chair in the Public Understanding of Science at Oxford University. He discusses the background of the Riemann hypothesis and some of the mathematicians who tried to solve it. He does this in an entertaining way, accessible to everyone who has an interest in mathematics.

Wednesday, February 25, at noon in KT 218

Pizza and soft drinks will be provided to those in attendance.

Open to all interested students.
