Fabricator is responsible for matching all colors and materials as specified and are required to provide color and material samples to Corbin for approval.

CAUTION!
CONSISTENT AND ACCURATE COLOR REPRODUCTION IN THIS DOCUMENT CANNOT BE ASSURED DUE TO THE LIMITATIONS OF COLOR COPYING TECHNOLOGY.

The Coated Pantone Matching System®, Matthews and/or Akzo Nobel Paint systems are used for specifying signage color matches. (In the absence of actual sign material color chip reference sets, actual specified product color swatches should be referenced for color matching.)

Shown here are approximations of the primary signage background colors and supporting accent colors. Actual color finishes on signage must be matte or low luster (not shiny or glossy unless otherwise noted) and exclusively a premium acrylic polyurethane.

Signage paints produced by MPC Matthews Paint and Akzo Nobel Paint Company are to be the standard reference.

Vinyl Films from 3M and Avery Graphics are to be the standard.

Color application varies per sign type, refer to drawings for appropriate application.

Symbol Standards
Painted aluminum U channel fabricated from .050 (th.) material to hold acrylic lens in place.

3/8" (th.) painted acrylic header mounted to L-shaped retainers using 3M Dual Lock (SJ4570 Clear). Headers are rabbit cut so that the header sits flush to the edge of the retainer edge.

All signs to be mechanically fastened to the wall.

Bottom edge of acrylic header is beveled.

Painted aluminum U channel fabricated from .050 (th.) material to hold acrylic lens in place.

Removable, gravity lock, 1/8" (th.) non-glare acrylic lens.

1/8" (th.) painted acrylic backer panel with screened image of the IPFW identity.

Space to accommodate printed insert. The thickness of the paper must be heavy enough such that no wrinkling or waves will occur once installed into the sign housing. If necessary, rigid backers or UV overlaminates may be used.

1/4" (th.) painted acrylic backer panel.

3/16" (th.) wall spacer (acrylic, PVC, or Komacel) inset 1/2" from sign frame on all sides.

Dotted line represents L-shaped, painted aluminum side retainer (shown as transparent).

For smaller signs (I-2 and I-3), the sides are notched to allow for a paper insert to be slid out of either side.

3/8" (th.) painted acrylic header is rabbit cut so that the header sits flush to the edge of the retainer edge.

1/8" (th.) painted acrylic backer panel. For smaller signs (I-2 and I-3), the sides are noched to allow for a paper insert to be slid out of either side.

Mechanical fastener.

Bottom edge of acrylic header is beveled.

Painted aluminum U channel fabricated from .050 (th.) material to hold acrylic lens in place.

See detail to left for acrylic lens, insert and backer panel fabrication.

1/4" (th.) painted acrylic backer panel.
