A Movie and Pizza

Fermat's Last Tango

A Musical by Joanne Sydney Lessner and Joshua Rosenblum

The story centres on that of Andrew Wiles, re-named here as Daniel Keane. It tracks the agonising months endured by Keane as he realises his much-heralded proof of Fermat's Last Theorem contains a major error. With the full glare of the world's media and academia on him, Keane sets about fixing this flaw, and in a surreal twist to the real-life events, is aided by the newly resurrected Fermat himself, alongside Pythagoras, Gauss, and Euclid. — Simon Singh

“The music is engaging and dynamic. Hearing the recording will make you want to see the show. The recording is of the York Theatre Company cast and the voices and performances are all tops.” — Chris Curdo

Part 1: Monday, October 25 at noon in KT 216.
Part 2: Monday, November 1 at noon in KT 216.

Pizza both days!

Open to all interested students.
